## DETAILED ACTION

### *Claim Objections*

1. Claim 12 objected to because of the following informalities:

line 2, "compromising" should be "comprising".

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Doi et al. (US 4919402).

Doi et al. disclose a spring/mass vibratory force coupler (Fig. 2) with variable damping and variable spring stiffness for coupling masses to a reference mass including a first mass (the engine) coupled to a second mass (the chassis) via a first spring KE and a second spring KO independent of the first spring, arranged in parallel, a damper CO, arranged between the second spring and the first mass wherein a damping function of the damper may be varied based on an application of a voltage to an electrorheological or magnetorheological fluid contained therein so as to provide a continuously variable spring stiffness, wherein when the damping function of the damper is turned off, the second spring couples the first mass and the second mass without any damping function (see col. 7 line 31).

Re claim 10, see small mass m.

Re claim 11, see coupling element 34

Re claim 12, see mass 22

Re claim 13, see Fig. 2

Re claim 14, see col. 3 lines 35-40

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 9-14 have been considered but are moot in view of the new ground(s) of rejection. Note that Applicant's definition of between necessitated the new grounds of rejection.

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
